

Place Value to 10,000

Year 3 Mathematics | Aussie Primary Academy

Name: _____

Date: _____

ACARA v9.0: AC9M3N01 - recognise, represent and order natural numbers using place value understanding.

Supporting: AC9M3N03 - use place value to partition, rearrange and regroup numbers when solving problems.

Learning Intention

I can read, order, expand and compare numbers using place value.

Strategy Box

Say the number. Split it into thousands, hundreds, tens and ones. Compare from the largest place first.

Worked Example

$4,372 = 4 \text{ thousands} + 3 \text{ hundreds} + 7 \text{ tens} + 2 \text{ ones}$. It is greater than 4,237 because 3 hundreds is greater than 2 hundreds.

A. Warm Up

- Write the value of the underlined digit: 3,482. The underlined digit is 4. Value: _____
- Expand this number: $2,615 = \text{_____} + \text{_____} + \text{_____} + \text{_____}$
- Circle the larger number: 5,409 or 5,904

B. Build Your Skills

- Order these numbers from smallest to largest: 3,208 3,820 3,082 3,802
- Build the largest number possible using 6, 1, 9 and 4 once each: _____. Explain your thinking:

- A school library has 2,458 picture books and 2,845 chapter books. Which collection has more books? How do you know?

C. Strong Challenge

1. Create a number between 4,500 and 4,800 with an 6 in the tens place. Show it in expanded form. _____

I Can Checklist

- ☐ I can identify place value.
- ☐ I can compare and order numbers.
- ☐ I can explain my thinking.

★ High Five!

You used place value like a mathematician today!

Parent Tip - At Home

Make a funny "number shop" at home. Price toys with 4-digit numbers and ask your child to find the most expensive bargain.

Teacher Tip - In Class

Use a place value chart on the board. Ask students to point to the first place where two numbers differ before choosing the larger number.

Teacher Feedback

Strength: _____ Next step: _____

Place Value to 10,000 - Answer Key

Year 3 Mathematics | Teacher Notes

Name: _____

Date: _____

ACARA v9.0: AC9M3N01 - recognise, represent and order natural numbers using place value understanding.

Supporting: AC9M3N03 - use place value to partition, rearrange and regroup numbers when solving problems.

Answer Key

Warm Up: 1) 400. 2) $2,000 + 600 + 10 + 5$. 3) 5,904.

Build: 1) 3,082, 3,208, 3,802, 3,820. 2) 9,641 with explanation. 3) Chapter books; 2,845 is greater than 2,458.

Strong Challenge: Answers vary. Example: $4,760 = 4,000 + 700 + 60 + 0$.

Parent/Teacher Extension

Ask students to write a clue for a mystery 4-digit number and swap with a partner.
