

Maths Word Problems

Year 3 Mathematics | Aussie Primary Academy

Name: _____

Date: _____

ACARA v9.0: AC9M3N02 - recognise and use relationships between operations to solve practical problems.

Supporting: AC9M3N03 - add and subtract two- and three-digit numbers using efficient strategies.

Learning Intention

I can read a maths story, choose an operation and explain my answer.

Strategy Box

Read the story. Circle the numbers. Underline action words. Decide which operation makes sense, then write a number sentence.

Worked Example

There are 124 red beads and 238 blue beads. Total beads means add: $124 + 238 = 362$.

A. Warm Up

1. Ava has 36 cards and gets 12 more. Total: _____
2. Noah has 80 marbles and loses 25. Left: _____
3. There are 4 plates with 5 biscuits on each. Total biscuits: _____

B. Build Your Skills

1. A bus has 148 passengers in the morning. 76 more passengers get on later. How many passengers altogether? Number sentence: _____
2. A school has 320 seedlings. Students plant 185 of them. How many seedlings are left?

3. There are 6 boxes with 4 tennis balls in each box. How many tennis balls are there? _____

C. Strong Challenge

1. Write a two-step word problem about a school fair. It must include addition and subtraction. Solve it and explain each step.

I Can Checklist

- ☐ I can find important numbers.
- ☐ I can choose an operation.
- ☐ I can explain each step.

★ High Five!

You turned stories into smart maths - High Five!

Parent Tip - At Home

Make problems from real life: "We had 12 socks. The washing machine monster ate 3. Then we found 4. How many now?"

Teacher Tip - In Class

Teach a three-mark routine: circle numbers, underline the question, box the operation clue. Then students solve.

Teacher Feedback

Strength: _____ Next step: _____

Maths Word Problems - Answer Key

Year 3 Mathematics | Teacher Notes

Name: _____

Date: _____

ACARA v9.0: AC9M3N02 - recognise and use relationships between operations to solve practical problems.

Supporting: AC9M3N03 - add and subtract two- and three-digit numbers using efficient strategies.

Answer Key

Warm Up: 1) 48. 2) 55. 3) 20.

Build: 1) $148 + 76 = 224$ passengers. 2) $320 - 185 = 135$ seedlings. 3) $6 \times 4 = 24$ tennis balls.

Strong Challenge: Answers vary. Check that students include two steps and a clear explanation.

Parent/Teacher Extension

Ask students to swap problems and identify the operation before solving.
