

Name: _____

Date: _____

LEARNING TARGET

I can find the percent, part, or whole in real-world problems.

KEY STRATEGY + WORKED EXAMPLE

Translate percent to a decimal or fraction over 100, multiply by the whole, and check whether the part is reasonable.

35% of 80 = $0.35 \times 80 = 28$.

A. TRY TOGETHER - USE THE STRATEGY

1. Find 25% of 80 = ____
2. Find 15% of 240 = ____
3. Find 60% of 45 = ____
4. Find 35% of 120 = ____

B. CORE PRACTICE - SHOW YOUR WORK

5. Find 12.5% of 64 = ____
6. Find 75% of 36 = ____

7. Find 40% of 95 = ____

8. Find 20% of 350 = ____

9. Find 5% of 480 = ____

10. Find 90% of 70 = ____

11. Find 25% of 80 = ____

12. Find 15% of 240 = ____

C. INDEPENDENT FLUENCY - CALCULATE AND CHECK

13. Find 60% of 45 = ____
14. Find 35% of 120 = ____
15. Find 12.5% of 64 = ____
16. Find 75% of 36 = ____
17. Find 40% of 95 = ____
18. Find 20% of 350 = ____
19. Find 5% of 480 = ____
20. Find 90% of 70 = ____

Name: _____

Date: _____

D. APPLY THE SKILL

21. A \$48 jacket is 25% off. Find discount and sale price.

22. 18 of 24 students submitted work. What percent?

23. After a 20% increase, a quantity is 72. Find the original amount.

E. REASON, CHECK AND CORRECT

24. Explain why 120% of a number is greater than the number.

25. Correct: 15% of $60 = 9$, so a 15% discount gives a price of \$9.

EXIT TICKET + CHALLENGE

26. Find 62.5% of 48 using two methods.

Challenge: Write a tax, tip, or discount problem with a non-whole-number answer.

F. STUDENT REVIEW - SHOW WHAT YOU UNDERSTAND

Use your own words so your teacher can see what you understand and what to practise next.

27. Explain one strategy you used today.

28. Check one answer in a different way.

29. Circle one: I understand it | I need more practice | I need help

30. The easiest part was: _____

31. The most difficult part was: _____

Why was it difficult? _____

32. My next practice step is: _____

TEACHER COPY - ANSWERS AND SUPPORT

ANSWER KEY

- A. 1) 20, 2) 36, 3) 27, 4) 42
B. 5) 8, 6) 27, 7) 38, 8) 70, 9) 24, 10) 63, 11) 20, 12) 36
C. 13) 27, 14) 42, 15) 8, 16) 27, 17) 38, 18) 70, 19) 24, 20) 63
D. 21) \$12 discount; \$36 sale price. 22) 75%. 23) 60.
E. 24) $120\% = 1.2$, which is greater than 1 whole. 25) Discount is \$9; sale price is \$51.
EXIT. 26) 30.

Challenge: Answers vary. Check that the student's example follows every condition and that the reasoning is mathematically correct.

F. 27-28) Answers vary. Look for a clear strategy and a valid second check. 29-32) Use the reflection to identify confidence, difficulty and the next teaching step.

COMMON MISCONCEPTIONS

Students may report the discount as the final price. Identify part, whole, rate, and the quantity requested.

TEACHER CHECK

- ☐ Uses an appropriate Grade 6 Math strategy.
- ☐ Shows or explains thinking clearly.
- ☐ Checks a response using evidence, a rule, or a second method.
- ☐ Identifies a specific difficulty and useful next practice step.

PARENT / TEACHER TIP

Ask the child to explain how they know, not only state an answer. If the explanation is unclear, use small objects, a drawing, or a number line before returning to symbols.

NEXT STEP

Revisit the item the child marked difficult. Model one example, solve one together, then ask the child to complete one independently and explain the strategy.
