

Name: _____

Date: _____

LEARNING TARGET

I can write, evaluate, and identify equivalent algebraic expressions.

KEY STRATEGY + WORKED EXAMPLE

Translate phrases carefully, substitute with parentheses, follow order of operations, and combine like terms.

Three more than twice x is $2x + 3$; at $x=5$, the value is 13.

A. TRY TOGETHER - USE THE STRATEGY

1. Evaluate $4x + 7$ when $x=5 =$ ____
2. Evaluate $3a - 8$ when $a=12 =$ ____
3. Evaluate $2(n+6)$ when $n=9 =$ ____
4. Evaluate $m/4 + 3$ when $m=28 =$ ____

B. CORE PRACTICE - SHOW YOUR WORK

5. Evaluate $5p - 2p + 1$ when $p=7 =$ ____
6. Evaluate $6 + 2y$ when $y=11 =$ ____

7. Evaluate $3(r-4)$ when $r=10 =$ ____

8. Evaluate $q/5 - 2$ when $q=35 =$ ____

9. Evaluate $4b + 3 - b$ when $b=6 =$ ____

10. Evaluate $2c + c/2$ when $c=8 =$ ____

11. Evaluate $4x + 7$ when $x=5 =$ ____

12. Evaluate $3a - 8$ when $a=12 =$ ____

C. INDEPENDENT FLUENCY - CALCULATE AND CHECK

13. Evaluate $2(n+6)$ when $n=9 =$ ____
14. Evaluate $m/4 + 3$ when $m=28 =$ ____
15. Evaluate $5p - 2p + 1$ when $p=7 =$ ____
16. Evaluate $6 + 2y$ when $y=11 =$ ____
17. Evaluate $3(r-4)$ when $r=10 =$ ____
18. Evaluate $q/5 - 2$ when $q=35 =$ ____
19. Evaluate $4b + 3 - b$ when $b=6 =$ ____
20. Evaluate $2c + c/2$ when $c=8 =$ ____

Name: _____

Date: _____

D. APPLY THE SKILL

21. Write and evaluate 'five less than three times n ' for $n=8$.

22. A gym charges \$12 plus \$4 per visit. Write an expression and find cost for 9 visits.

23. Use the distributive property to show $6(x+3)$ is equivalent to $6x+18$.

E. REASON, CHECK AND CORRECT

24. Explain the difference between $5x$ and $x+5$.

25. Correct: '8 less than y ' is $8-y$.

EXIT TICKET + CHALLENGE

26. Simplify $4(2x+3)-5x$ and evaluate at $x=6$.

Challenge: Write two different expressions that are equivalent for every value of x .

F. STUDENT REVIEW - SHOW WHAT YOU UNDERSTAND

Use your own words so your teacher can see what you understand and what to practise next.

27. Explain one strategy you used today.

28. Check one answer in a different way.

29. Circle one: I understand it | I need more practice | I need help

30. The easiest part was: _____

31. The most difficult part was: _____

Why was it difficult? _____

32. My next practice step is: _____

TEACHER COPY - ANSWERS AND SUPPORT

ANSWER KEY

- A. 1) 27, 2) 28, 3) 30, 4) 10
B. 5) 22, 6) 28, 7) 18, 8) 5, 9) 21, 10) 20, 11) 27, 12) 28
C. 13) 30, 14) 10, 15) 22, 16) 28, 17) 18, 18) 5, 19) 21, 20) 20
D. 21) $3n-5$; at $n=8$, 19. 22) $12+4v$; at $v=9$, \$48. 23) $6(x+3)=6x+18$.
E. 24) $5x$ is five times x ; $x+5$ is five more. 25) $y-8$.
EXIT. 26) $3x+12$; at $x=6$, 30.

Challenge: Answers vary. Check that the student's example follows every condition and that the reasoning is mathematically correct.

F. 27-28) Answers vary. Look for a clear strategy and a valid second check. 29-32) Use the reflection to identify confidence, difficulty and the next teaching step.

COMMON MISCONCEPTIONS

Students may reverse subtraction phrases or omit multiplication. Translate the relationship before inserting numbers.

TEACHER CHECK

- ☐ Uses an appropriate Grade 6 Math strategy.
- ☐ Shows or explains thinking clearly.
- ☐ Checks a response using evidence, a rule, or a second method.
- ☐ Identifies a specific difficulty and useful next practice step.

PARENT / TEACHER TIP

Ask the child to explain how they know, not only state an answer. If the explanation is unclear, use small objects, a drawing, or a number line before returning to symbols.

NEXT STEP

Revisit the item the child marked difficult. Model one example, solve one together, then ask the child to complete one independently and explain the strategy.
