

Living Things Grow and Change

Year 2 Science | Aussie Primary Academy

Name: _____

Date: _____

ACARA v9.0: AC9S2U01 - Living things grow, change and have offspring similar to themselves.

Learning Intention

I can describe how living things grow and change over time.

Mini Lesson

Living things grow and change. A plant can grow from a seed. An animal can grow from a baby into an adult. A life cycle shows the stages of a living thing.

Vocabulary

living

grow

change

life cycle

A. Circle or Tick

Circle living things:
seedling rock puppy chair child tree

B. Match

Match the stage:
seed -> seedling
baby -> adult
caterpillar -> butterfly

Living Things Grow and Change

Year 2 Science | Do, Think and Explain

Name: _____

Date: _____

ACARA v9.0: AC9S2U01 - Living things grow, change and have offspring similar to themselves.

C. Sort and Think

Number each frog life stage in order:

___ adult frog ___ egg ___ tadpole ___ young frog

D. Draw and Label

Draw three stages of one living thing's growth.

E. Science Detective

How do you know a living thing has changed? Give one example.

I Can Checklist

- ☐ I can identify living things.
- ☐ I can order life stages.
- ☐ I can describe change.

Living Things Grow and Change - Answer Key

Year 2 Science | Teacher Notes

Name: _____

Date: _____

ACARA v9.0: AC9S2U01 - Living things grow, change and have offspring similar to themselves.

Answer Key

A: seedling, puppy, child, tree.

B: seed - seedling; baby - adult; caterpillar - butterfly.

C: 1 egg, 2 tadpole, 3 young frog, 4 adult frog.

D/E: Answers vary. A living thing may become bigger, grow new parts, change shape or become an adult.

Parent/Teacher Tip

Look at photos of a plant, pet or person at different ages and discuss what changed.

Extension Idea

Create a simple life cycle strip with arrows between each stage.
